1935 Index—Electrical Engineering and Transactions

This multientry annual reference index covers comprehensively the entire text content of the 12 issues of ELECTRICAL ENGINEERING published during 1935 and of the identical content of the 1935 A.I.E.E. TRANSACTIONS, volume 54.

Discussions have received particular attention and a special effort has been made to provide effective correlation between references to technical papers and to all published discussions of those papers. In this connection it is of importance to note that discussions of many technical papers published during the latter half of 1934 were published in the early part of 1935, and hence appear in this current index. Likewise, many discussions of the later 1935 papers will be published early in 1936, and consequently will not be found among the references contained in this current index.

For convenience in use, this index is subdivided into the following general divisions:

1. Technical subjects.
2. Authors, including the writers of discussions.
3. News items pertaining to Institute activities.
4. News items of a general nature.
5. Biographical (personal and obituary) items.

Division I—
Technical Subject Index

Adequate Lighting Is a Sound Investment. Wood 421–3
Advanced Course in Engineering, An. Stevenson, Howard 265–8
A-C Electrolytic Capacitor, The. Lomont, Dunleavey 1058–63
(A-C Machines) Self Excitation of a Frequency Converter. Hess 1359–66
(A-C Networks) Calculation of Power Flow and Bus Voltages. Smith 408–16
Alternator, An Electronic Regulator for an. Whipple, Jacobsen 663–7
Alternators, Insulation for High Voltage. Laffoon, Calvert 624–31
Aluminum Cable, Inductance of Steel Reënforced. Woodruff 296–9
A.I.E.E. As an Educational Institution, The. Johnson 146–8
(A.S.A) Standardization of Noise Meters. McCurdy 14–5
Disc 437
Analysis of Rectifier Filter Circuits. Stout 977–84
Analysis of the Induction Motor, An. Levine 526–9
"Angle Switching" of Synchronous Motors. Shutt, Dawson 1191–5
Anode Materials for High Vacuum Tubes. Spitzer 1246–51
Application of Electron Tubes in Industry. Chambers 82–92
Disc 753
(Letter) Bauer 1018
Applications of a Photoelectric Cell. Lamb 1186–90
Arc Furnaces, Power Company Service to. Clark 1173–8
Arc, High Velocity Streams in the Vacuum. Easton, Lucas, Creedy. (Nov. 1934, p. 1454–60)
Disc. 444; clos 756
Arc Welding in Argon Gas. Doan, Schulte 1144–9
Arcover in Air, Insulator. Maxstadt. (July 1934, p. 1062–8)
Disc. 234; clos 236
Argon Gas, Arc Welding in. Doan, Schulte 1144–9
Armature Leakage Reactance of Synchronous Machines. March, Crary 378–81
Disc. 1116; clos 1118
Armature Leakage Reactance, Test Values of. Rogers 700–5
Armature Resistance of Synchronous Machines, Tests on. Robertson 705–9
Arresters, Discharge Currents in Distribution. McEachron, McMorris 1395–9
Artificial Line, Transients in the Finite. Weber, Di Toro 661–3
Audio Generator, An Electrostatic. Kurtz, Larsen 950–5
Automatic Control for a Roughing Mill. Watson 656–60
(Automatic Stations) An Electronic Regulator for an Alternator. Whipple, Jacobsen 663–7
(Automatic Stations) An Electronic Voltage Regulator. Craig, Sanford 166–70
(Automatic Stations) Step Type Feeder Voltage Regulators. Hill 154–8
Disc. 993; clos 993
Automobile Fatalities, The Important Role Played by Street Lighting in. 969

B

Battery Charging, Storage. Woodbridge 516–25

Page Allocations by Issues

January 1– 144
February 145– 260
March 261– 356
April 357– 468
May 469– 580
June 581– 692
July 693– 804
August 805– 916
September 917–1028
October 1029–1140
November 1141–1284
December 1285–1444

Biway System of Electric Platforms for Mass Transit. Storer 1340–7
Board of Directors, Report of the 735–47
Boulder Canyon Project, Some Features of the. Scattergood 361–5
Boulder Dam and Power Plant, Engineering Features of. McClellan 583–94
Boulder Dam Line, Circuit Breakers for. Prince 366–72
Boulder Dam-Los Angeles Lines, Engineering Features of the. Scattergood 494–512
Breakdown Curve for Solid Insulation. Montsinger 1300–1
Breakdown in Vacuum, Effect of Total Voltage on. Anderson 1315–20
Breakdown Voltage, Effect of Ultraviolet on. Nord 955–8
Breaker and Voltage Recovery Tests, Oil Circuit. Poitras, Kuehni, Skeats 170–8
Breaker Performance Studied by Cathode Ray Oscillograms. Van Sickle 178–84
Bridge and Oil Cell, The M.I.T. Power Factor. Balsbaugh, Kenney, Herzenberg 272–9
Disc. 559, 748; clos 748
Bridge for Field Tests, Portable Schering. Hill, Watts, Burr. (Jan. 1934, p. 176–82)
Disc. 888; clos 986
Bridge Measurement of Electromagnetic Forces. Seletzky, Friday 1149–52
Brush Jumping, Flashing of Railway Motors Caused by. Hellmund 1178–85
Brush Wear, Electrical. Hessler 1050–4
Brushes of Commutator Machines, Sparking Under. Hellmund, Ludwig 315–21
Disc. 1109; clos 1110
Bus Voltages, Calculation of Power Flow and. Smith 408–16

C

Cable Code Translator System, A. Connery 1162–6
Cable, Inductance of Steel Reënforced Aluminum. Woodruff 296–9
Cable Insulation, A Criterion of Quality of. Wyatt, Spring 417–21
Cable Sheath Corrosion—Causes and Mitigation. Blomberg, Douglas 382–7
Disc 885
Cable Sheaths, Transient Voltages on Bonded. Halperin, Clem, Miller 73–82
Disc. 436; clos 766
Cable System Neutral Grounding Impedance. Clem 30–40
Disc. 324, 434; clos 768
Cables, Economical Loading of Under-

ground. Church 1166–72
Cables, Resistance and Reactance of 3-Conductor. Salter, Shanklin, Wiseman. (Dec. 1934, p. 1581–9) Disc. 324; 436; clos. 882
Calculation of Power Flow and Bus Voltages. Smith 408–16
Calculations for Coreless Induction Furnaces. Dwight, Bagsi 312–5
Capacitive Excitation for Induction Generators. Bassett, Potter 540–5
Disc. 1106
Capacitor, A New Carrier-Current Coupling. Eby 848–52
Capacitor Motors With Windings Not in Quadrature. Puchstein, Lloyd 1235–9
Capacitor, The A-C Electrolytic. Lomont, Dunleavey 1058–63
Carrier-Current Coupling Capacitor, A New. Eby 848–52
Carrier Current Relay Installation, A. Browne, Vest 109–15
Disc. 333, 445; clos. 558
Catenary Calculations, Transmission Line. Ehrenburg 719–28
Cathode Ray Oscillograms, Breaker Performance Studied by. Van Sickle 178–84
Cathode Ray Oscillograph for Observing 2 Waves, A. George, Heim, Mayer, Roys 1095–1100
Cathode Ray Oscillograph, Multiple-ment Operation of the. Woodruff 1045–7
Cathode Ray Tubes and Their Application. Stinchfield. (Dec. 1934, p. 1608–15)
Disc. 749
Cellulose Paper, Dielectric Properties of. Whitehead, Greenfield. (Oct. 1934, p. 1389–94; Nov. 1934, p. 1498–1503)
Disc. 322, 431; clos. 766
Characteristics of a Group of Engineers. Spooner. (Dec. 1934, p. 1571–6)
Disc. 757; clos. 760
(Letter) Hayes 1017
Characteristics of A-C Conductor Corona, Some. McMillan 282–92
Circuit Analysis, Operational Method of. Robertson 1037–45
Circuit Breaker, The Expulsion Oil. Schwager. (July 1934, p. 1108–15)
Disc. 212; clos. 214
Circuit Breakers for Boulder Dam Line. Prince 366–72
Circuit Breakers for Steel Mill Service, D-C. Deans 594–8
Circuit for Closing a Switch, A New Trigger. Ruis 1405–7
Circuit Recovery Rates, The Determination of. Boehne 530–9
Circuits, Analysis of Rectifier Filter. Stout 977–84
Circuits, Current and Voltage Loci in 3-Phase Y-Y. Seletsky 970–6
Circuits, Current Harmonics in Nonlinear Resistance. Owens 1055–7
Circuits, Steady State Solution of Saturated. Beckwith 728–34
Cobalt, Magnetic Alloys of Iron, Nickel, and. Elmen 1292–9
Code Translator System, A Cable. Connery 1162–6
"Comet"—A Diesel Electric Unit Train, The. Candee 1240–5
(Com. rept.) Lightning Performance of 220 Kv Lines. (Nov. 1934, p. 1443–7)
Disc. 446; clos. 780
(Communication) A Cable Code Translator System. Connery ... 1162–6
(Communication) A New Carrier-Current Coupling Capacitor. Eby .. 848–52
(Communication) A Radio Interference Measuring Instrument. McMillan, Barnett 857–62
(Communication) Anode Materials for High Vacuum Tubes. Spitser 1246–51
(Communication) Application of Electron Tubes in Industry. Chambers 82–92
Disc. 753
(Communication) Applications of a Photoelectric Cell. Lamb 1186–90
(Communication) Cable Sheath Corrosion—Causes and Mitigation. Blomberg, Douglas 382–7
Disc. 885
(Communication) Cathode Ray Tubes and Their Application. Stinchfield. (Dec. 1934, p. 1608–15)
Disc. 749
Communication Circuits, A Wattmeter for. Eldredge 279–81
(Communication) Earth Resistivity and Geological Structure. Card. 1153–61
Communication Equipment, Silicon Steel in. Crawford, Thomas 1348–53
(Communication) Industrial Electronic Control Applications. Gulliksen, Stoddard 40–9
Disc. 752; clos. 753
(Communication) Joint Use of Poles With 6,900 Volt Lines. Bullard, Keyes. (Dec. 1933, p. 890–8)
Disc. 210; clos. 212
(Communication) Line Filter for Program System. Clement. (Apr. 1934, p. 562–6)
Disc. 210
(Communication) Magnetic Alloys of Iron, Nickel, and Cobalt. Elmen 1292–9
(Communication) Measurement of Telephone Noise and Power Wave Shape. Barstow, Blye, Kent 1307–15
(Communication) Present Status of Ferromagnetic Theory. Bozorth. 1251–61
(Communication) Probability in Engineering. Molina 423–7
(Communication) Protective Signaling. Farmer 617–23
Disc. 1118; clos. 1118
(Communication) Ratings of Industrial Electronic Tubes. Pike, Ulrey. (Dec. 1934, p. 1577–80)
Disc. 754
Communication, Recent Research in Radio. Hamburger 843–6
(Communication) Resonant Lines for Frequency Control. Hansell ... 852–7
(Communication) Ship-to-Shore Radio in Puget Sound Area. Hansen .. 828–31
Communication System, A Power Company. George Huie 262–5
Disc. 884; clos. 885
(Communication) The Hawaiian Radiotelephone System. Harrington, Hansell 822–8
(Communication) The Newly Discovered Elementary Particles. Darrow 808–16
(Communication) The Status of Television in Europe 966–9
Communication Transformers, Improvements in. Gans, Laird 1367–73
(Communication) Transients in the Finite Artificial Line. Weber, Di Toro 661–3
(Communication) Ultra-Short Waves in Urban Territory. Burrows, Hunt, Decino 115–24
Disc. 749; clos. 749
(Communication) Use of Vacuum Tubes in Measurements. Horton 93–102
(Communication) Wide-Band Open-Wire Program System. Hamilton. (Apr. 1934, p. 550–62)
Disc. 210
(Communication) Wide Band Transmission Over Balanced Circuits. Clark 27–30
Commutated Stationary Conversion, Vibratorily. Southgate 1213–21
(Commutation) Flashing of Railway Motors Caused by Brush Jumping. Hellmund 1178–85
Commutator Machines, Sparking Under Brushes of. Hellmund, Ludwig 315–21
Disc. 1109; clos. 1110
Complex Hyperbolic Function Charts. Woodruff 550–4
Disc. 1002
Conductor Vibration, Field Tests on. Wright, Mini. (July 1934, p. 1123–7)
Disc. 207
Conductors, Vibration Analysis—Transmission Line. Buchanan. (Nov. 1934, p. 1478–85)
Disc. 334; clos. 779
Connors Creek Plant, Rehabilitation of the. Greene 610–7
Disc. 1000; clos. 1105
Constant-Current D-C Transmission. Willis, Bedford, Elder 102–8
Disc. 327, 447; clos. 882
(Control) A New Carrier-Current Coupling Capacitor. Eby 848–52
(Control) "Angle Switching" of Synchronous Motors. Shutt, Dawson 1191–5
Control Applications, Industrial Electronic. Gulliksen, Stoddard 40–9
Control for D-C Machines, Precise Speed. Frasier, Eisler, Franta .. 307–12
Control of Potential Over Insulator Surfaces. Bennett, Fredendall .. 1084–7
Control of Transients in Welding Generators. Hornby. (Dec. 1934, p. 1598–1602)
Disc. 441
Control, Resonant Lines for Frequency. Hansell 852–7
Conversion, Vibratorily Commutated Stationary. Southgate 1213–21
Converter, Self-Excitation of a Frequency. Hess 1359–66
Corona Conductor, Some Characteristics of A-C. McMillan 282–92
Corona Losses at 230 Kv With One Conductor Grounded. Carroll, Simmons 846–7
Corrosion—Causes and Mitigation, Cable Sheath. Blomberg, Douglas 382–7
Disc. 885
Counterpoise Tests at Trafford. Fortescue, Fielder. (July 1934, p. 1116–23)
Disc. 218; clos. 232
Counterpoise, Theory and Tests of the. Bewley. (Aug. 1934, p. 1163–72)
Disc. 218, 228; clos. 228
Coupling Capacitor, A New Carrier-Current. Eby 848–52
Criterion of Quality of Cable Insulation, A. Wyatt, Spring 417–21
Current and Voltage Loci in 3-Phase Y-Y Circuits. Seletsky 970–6
Current Harmonics in Nonlinear Resistance Circuits. Owens 1055–7

D

Definitions of Power and Related Quantities. Curtis, Silsbee 394–404
Disc. 1120
Delta-Connected Transformers With Mid-Taps, Loads on. Larson ... 931–4
Design and Operation of Huntley Station No. 2. Cushing 632–45
Disc. 996
Determination of Circuit Recovery Rates, The. Boehne 530–9
Dielectric Properties of Cellulose Paper. Whitehead, Greenfield. (Oct. 1934, p. 1389–94; Nov. 1934, p. 1498–1503)
Disc. 322, 431; clos. 766
Dielectric Research, Recent Progress in. Whitehead 1288–91
Dielectric Strength of Mineral Oils.

Clark 50–5
